

INDUSTRIAL TALK 1 (SECTION 5 GROUP 6) :

OVERVIEW OF ICT JOBS IN

CLARITY TECHWORKS SDN BHD

01

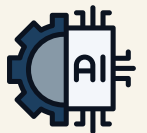

EXECUTIVE SUMMARY

The objective of this career talk is to provide an overview of the company's work culture and the career path. The Junior Android developer, Junior UI/UX Designer, QA Testing Analyst, and Junior Web Developer of the company also revealed the job scope of their department, and skills needed in their position and gave some advice to all the participants so that all of us have some clearer imagination for our future.

INTRODUCTION

The Clarity Techworks is a Fintech company based in Singapore and Malaysia. The industrial talk lead by Mr.Yee, Chief Technology Officer and his team. The market environment for ICT jobs has encountered a challenge during pandemic COVID-19 and become more competitive when technicians are in high demand. They have shared their experiences, softskills and hardskills that needed in such era to perform well. QnA session has also been held to answer student's curiosity about the ICT industry.

CONTENT OF TALK

The speakers talked about the important skills that need to be possessed by someone working in the ICT field. One of the skills is to have a high standard for what you do. It is important to keep improving yourself and not get satisfied easily. It is also important to be a self-learner who is keen on learning new knowledge. We could learn something new from online websites and try to publish our projects to build a portfolio on GitHub. The speakers also talked about the difference between studying and working. As students, we have our lecturers to guide and tutor us, but as employees, we need to figure out the solution on our own as we don't have someone to spoon-feed us the answer to the problem. We can make mistakes and learn from them. However, when we are working, each mistake we make will have consequences that we might not be able to bear.

REFLECTION

This career talk exposed to us the ICT sector plays an important role to job creation and overall economic growth. The connection between ICT sector allows companies to maintain competitiveness in the global market and attract a larger audience. As a student who involved in ICT career, we need to be adaptable and engaged in continuous learning. This is due to the fact that all the jobs in ICT require individuals to be updated on the latest trends and learning new skills. Overall, this career talk not only emphasize the importance of ICT career but also give student a mindset about the skills required in our future such as time management, critical thinking, creativity and so on.
